Thanks, I'll take a look at them and add the import permit and pass these along to Ben.

Subject: RE: Oxitec response to comment

Hi, Eric. See my responses below in red. I am attaching the materials I mention below to this email. Please let Ben know that I have not yet included Michelle's modification into the human studies materials in the attached file. It is not relevant to his questions, and I thought it more important to respond to his direct questions rather than spend time incorporating Michelle's comments into the text prior to sending a response to him.

Subject: RE: Oxitec response to comment

Eric,

First, although I am still aiming to get draft responses to you by Sunday (March 22), it might not be until March 31 that I can complete this task. However, it looks like I am probably not going to be on leave next week after all, but even if I am (and haven't yet finished the legal RTCs), then I'll continue working on it next week until it's done. So, I plan to get it

done by March 31, regardless of whether I'm on leave next week or not. That said, please let me know ASAP if the "official" target date changes.

As to the legal comments themselves that you sent (attached for reference), here is my present thinking. Please note that I've included **bold, underlined** questions below for BPPD's response:

1) Comments Challenging EPA's Interpretation That FIFRA Can Be Used to Regulate OX5034 Mosquito

Ex. 5 Attorney Client (AC)

2) Comments Arguing the Agency Must Prepare a Full EIS Under the National Environmental Policy Act (NEPA)

Ex. 5 Attorney Client (AC)

However, it looks to me like most of the argument, here, is scientific in nature, as to why "GE mosquitos" are different, or more risky, than other things. As but one example of this:

Ex. 5 Attorney Client (AC)

Ex. 5 Attorney Client (AC)

3) Comments Stating that EPA Must Comply with the Endangered Species Act and Other Laws

Ex. 5 Attorney Client (AC)

Amanda responded.

4) Veterinary Feed Directive (21 USC 354)

Ex. 5 Attorney Client (AC)

5) Comments Questioning Whether Oxitec Can Be Released from the Contained Use Requirements of an Import Permit

Ex. 5 Attorney Client (AC)

6) EPA Should Not Rely on the Registrant Providing Assessment Data/Information

Ex. 5 Attorney Client (AC)

A) Human studies

Ex. 5 Attorney Client (AC)

B) Oxitec's purposes do not fit appropriate purposes of an EUP

Is there such a comment in play, here?

I did not see that comment in the docket.

C) Notification for export of GE insects from the EU per the Cartagena Protocol on Biosafety to the Convention on Biological Diversity

Is there such a comment in play, here?

There are comments on the requirements of EU law. I have included them elsewhere in the r2c document because they deal primarily with risk assessment. But if you think we should include as a specific note let's do so. Here is the comment from Friends of the Earth (0344) at page 17

Ex. 5 Attorney Client (AC)

Ex. 5 Attorney Client (AC)

D) New regulations covering GE mosquitos needed in light of FDA's GFI 236

Is there such a comment in play, here?

Yes, those comments are in the piece I am sending you.

E) EPA should (must?) do a rulemaking to un-exempt biological control agents

Is there such a comment in play, here?

No. No mention of biological control agents specifically.

F) FDA vs. EPA vs. APHIS jurisdiction?

Is there such a comment in play, here?

Not really. The only comment that begins to approach this idea is in the legal section we sent to you earlier. In it the commenter argues that none of the agencies have real authority to regulate.

G) Public hearing required

Is there such a comment in play, here?

Yes. Those comments are in the piece I am sending you

H) Migratory Bird Treaty Act and EO 13186

Is there such a comment in play, here?

No comments specifically refer to the Migratory Bird Act or EO 13186. Some comments, 0335 and 0344, state that EPA must consider all relevant laws. Those comments are in the section on EIS in the legal comments we sent you earlier.

I) "Legal" arguments regarding "no unreasonable adverse effects" finding under FIFRA

Is there such a comment in play, here?

Ex. 5 Attorney Client (AC)

Ex. 5 Attorney Client (AC)

Please let me know if you'd like to discuss.

Thanks!

- Ben

Sounds good, our meeting with Rick is at 430 so anything you can give me before that is helpful. Thanks.

Ben,

I just wanted to check in on your progress. We have a meeting with Rick today to provide an update. As mentioned previously our stated target date in BPPD is mid-April (right now is the 15th), but the existing march 31 date has not been moved at this time.

If you don't think you will finish this week, please let me know. I know you are on leave next week, we will convey what you think is doable to Rick. If you want to discuss on the phone, I have call forwarding on and should be available after 11 am this morning.

Thanks.
